

IS THIS YOUR CHILD?

The Life of a Boot

The life of a boot is, actually there is no life of a boot, boring, dull, dreary, sad, miserable and very depressing. Boots are used mainly during the winter. When they are used, they are treated very, very much like dirt. People don't realize it but they are actually hurting the boot. I would hate to be a boot because they kick around snow, walk in slush and get very messy. They naturally have no feelings because they are not alive. I can tell them apart also because they don't eat, breath, grow and reproduce. I think this report is stupid because it is a ridiculous topic but I will do it anyway. I am so stupid because I have my boots I have many boots so I have all of them. My blue boots are called blues and my green boots are called greens. I know you are glad to know the names of my boots. I know flaming my boots is pretty childish but at least I have an imagination. Next boots have a friend to talk, communicate with and share its feelings.

Figure 13.1. Linda's pessimism deteriorates from exposure to the pungent odor of chlorine bleach
